

Made In Japan

ARM RC Type Wire Rope Cutters

ARM RC-8 Wire Rope Cutter

ARM Sangyo RC-8 wire rope cutters are designed to cut wire rope material with ease for factory or on-site operations. Offering a maximum cutting capacity of 5mm diameter of wire rope material, ARM RC-8 wire rope cutters have been designed for ergonomic operation.

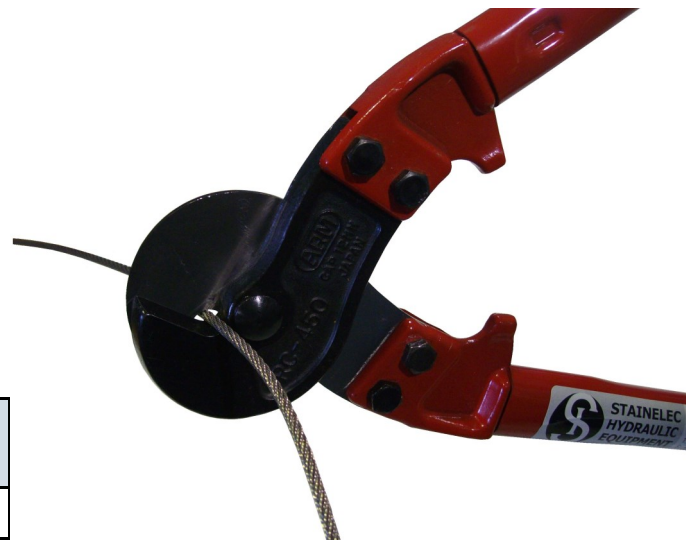

These wire rope cutters are ideal for cutting stainless steel wire ropes commonly used in the balustrade industry as well as boating and seal cutting applications.

Item No.	Over all Length (mm)	Cutting Capacity Dia. (mm)	Net Weight 1pce (Kg)
RC-8	195	5	0.3

ARM RC-450 Wire Rope Cutter

RC-450 wire rope cutter series available from Stainelec Hydraulic Equipment is designed to cut wire rope material with ease in factory or on-site operations.

Featuring a maximum cutting capacity of 12mm diameter wire rope material, ARM RC-450 wire rope cutters incorporate cutter blades that are drop forged and heat treated by ARMs special process during manufacturing to ensure a longer and reliable lifespan.

Item No.	Over all Length (mm)	Cutting Capacity Dia. (mm)	Net Weight 1pce (Kg)
RC-450	470	12	1.5

ARM RC-800 Wire Rope Cutter

RC-800 wire rope cutter series available from Stainelec Hydraulic Equipment is designed to cut wire rope material with ease in factory or on-site operations.

Featuring a maximum cutting capacity of 16mm diameter wire rope material, ARM RC-800 wire rope cutters incorporate cutter blades that are drop forged and heat treated by ARMs special process during manufacturing to ensure a longer and reliable lifespan.

Item No.	Over all Length (mm)	Cutting Capacity Dia. (mm)	Net Weight 1pce (Kg)
RC-800	800	16	3.9
