

TYB-D35 Rebar Bender

The TYB-D35 rebar bender has been designed to bend 32mm diameter rebar to a maximum bending angle of 180 degrees within 5 seconds. The dual angle adjustment system allows simultaneous bends for two different angles without adjusting the angle adjustment controls. The operation for each angle selection can be operated with either of the two foot switch controls.

Specifications

Specifications	Model TYB-D35 Rebar Bender
Bending Angle	180° / 5 Seconds
Bending Capacity	32mm Diameter Mild Steel Rebar
Motor	2.1kW (2 Motors)
Power	AC 220 / 240V, 50hz
Weight	180kgs
Dimensions (L x W x H)	673 x 500 x 447
Standard Accessories	24 Volt Foot Controls x 2 Multi Bending Die for Rebar up to 13mm x 1 Bending Die for Sizes 16, 19 & 25mm x 1 Bending Die Carry Case x 1
