SX-25

DK-65 Plier Duct Cutter

The DK-65 plier duct cutter is designed for cutting the teeth of the cable duct, leaving a professional finish to the edge cut material.

When using the Merry DK-65 duct cutter the operator will save time as there is no mess when cutting the duct so there are no small particles to clean up after use.

This tool is designed to increase efficiency as it requires very little effort to cut the PVC teeth and notches within the duct.

SX-25 Duct Cutter

The Merry SX-25 duct cutter is made in Japan and is ideal for cutting through cable duct sections and leaves a professional finish to the duct edge.

When using the Merry duct cutter, the operator will save time as there is no mess when using the SX-25 cutter. The SX-25 has a precision hardened steel blade with a lightweight aluminium body.

The SX-25 can cut plastic duct of up to 80mm wide and can cut flat and wide cable protector profiles diagonally or straight with ease.
