

The Edilgrappa TP 50 electric hydraulic flat bar cutter is a precision made tool that can be used for on-site or factory based environments with ease, which allows the operator more flexibility when in operation. The TP 50 can cut through 16mm (150 Grade) mild steel plate maximum thickness.

The Edilgrappa hydraulic bar cutting range is manufactured in Italy to ISO900 standards with quality hardened tool steel.

This range is available in both cordless and electric models and are equipped with adjustable support and stripping plates.

<u>Specifications</u>	Model TP 50 Flat Bar Cutter
Motor	230 Volt /50Hz
Maximum Cutting Thickness	16mm (150 Grade) Mild Steel
Weight	22Kgs
Dimensions	500 x 140 x 250mm
Maximum Cutting Force	25 Ton
Hydraulic Output Pressure	570 Bar Pressure

**FOR PROFESSIONALS THAT NEED TO CUT HIGH TENSILE FLAT  
BAR MATERIAL WITH EASE**
