

# TR40 / MU22 Rebar Straightener (interchangeable head)

Built in Italy, TR40 / MU22 electric rebar straighteners are portable hydraulic tools designed for plant operators to straighten coiled wire and rebar material easily.

The TR40 / MU22 has been developed for use in the production of rebar, round bar and wire products in the wire industry. Though electric, the TR40 / MU22 is extremely portable with a combined weight of only 18.8kgs which is ideal for on-site or factory environments.

The OH&S compliant rebar straightener features a unique interchangeable head system which enables the operator to change the operable heads to bend, straighten or cut depending on what material they are working on.

## Specifications

	<b>Model TR40 Bar Straightening Head / MU22 Electric Body</b>
<b>Motor</b>	230 Volt 50Hz 1150 Watt (Double Insulated)
<b>Maximum Straightening</b>	28mm (620N)
<b>Weight</b>	TR40 Head - 4.5Kgs MU22N Body - 13.3Kgs
<b>Dimensions L x W x H</b>	Total: 510 x 240 x 180mm
<b>Standard Accessories</b>	Heavy Duty Carry Case
<b>Hydraulic Pressure Output</b>	25Ton Capacity / 570 Bar

**FOR PROFESSIONALS THAT NEED TO STRAIGHTEN HIGH TENSILE REBAR**
