

# EDILGRAPPA

Made In Italy

## TR40 / TPS 22N Rebar Straightener (interchangeable head)

Built in Italy, Edilgrappa TR40 / TPS 22N petrol driven rebar straighteners are portable hydraulic tools designed for plant operators to straighten coiled wire and rebar material easily.

Edilgrappa specifically developed TR40 / TPS 22N for use in the production of rebar, round bar and wire products in the wire industry. Due to this unit being powered by Honda's GX35 4 stroke motor it is extremely portable for on-site or factory environments.

The OH&S compliant rebar straightener features a unique interchangeable head system which enables the operator to change the operable heads to bend, straighten or cut depending on what material they are working on.

### Specifications

	Model TR40 Bar Straightening Head / TPS 22N Petrol Body
Motor	Honda GX35 4 Stroke
Maximum Straightening	28mm (620N)
Weight	TR40 Head - 4.5Kgs TPS 22N Body - 15Kgs
Dimensions L x W x H	Total: 710 x 285 x 265mm
Standard Accessories	Heavy Duty Carry Case
Hydraulic Pressure Output	25Ton Capacity / 570 Bar

**FOR PROFESSIONALS THAT NEED TO STRAIGHTEN HIGH TENSILE REBAR**
