## F130N Hydraulic Industrial & Rescue Cutter

F130N Hydraulic Rescue Cutter

The Edilgrappa F130N rescue cutter is a precision engineered hydraulic cutter that can be used to shear and cut through metal obstructions in extrication scenarios and disaster relief areas. The F130N cutting head is hydraulically driven and can produce up to 700 Bar of pressure.

This unit can always be relied on for continuous use on rescue & extrication operations. Fitted with a special grip and compact design, the F130N demonstrates maximum portability options when applied in multiple rescue situations. This double acting unit can also be used in deep underwater scenarios for cutting steel and underwater cable.

<b>Specifications</b>	<b>Model F130N Hydraulic Cutter</b>
Maximum Blade Opening	130mm Dia Maximum Opening
Maximum Operating Force	Cutting Force - 24.5 Tonnes
Weight	11.8Kgs
Dimensions L x W x H	670 x 235 x 150mm
Standard Accessories	Heavy Duty Carry Case
Hydraulic Pressure Output	700 Bar Pressure

**RELIABLE FOR CUTTING APPLICATIONS IN ANY INDUSTRIAL OR RESCUE SITUATION**
