

F150N T40 S Cordless Hydraulic Shear Cutter – Petrol Motor

Innovators in Precision Hydraulic Cutting Tools & Equipment

MADE IN ITALY

The F150N cordless hydraulic steel cutter is a precision engineered hydraulic cutter that can be used to shear and cut through metal obstructions in extrication scenarios as well as industrial steel cutting applications. The F150N cutting head is hydraulically driven and can produce up to 700 Bar of hydraulic operating pressure.

This unit features a reliable Honda petrol motor that's designed to give the user the ability to transport it with ease on any active worksite without sacrificing power or precious time.

The F150N cutter can always be relied on for continuous use on rescue & industrial operations. Fitted with a special trigger grip, the F150N demonstrates maximum portability and easy to use controls in any working environment.
