

Feal Seam Model 1746 Table Rebar Cutter & Bender

Innovators in
Precision Rebar
Cutting &
Bending
Equipment

**MADE IN
ITALY**

This table rebar cutter & bender is capable of cutting 32mm (650 Grade) & 30mm (850 Grade) rebar and bending 38mm (650 Grade) & 36mm (850 Grade) rebar with ease. This unit is suitable for carrying out work on construction sites where a rebar production machine is required, or for high production cutting and bending applications in fabrication workshops.

FEAL 1746 Rebar Cutter & Bender Features:

- Gear box and cutting unit enbloc in spheroidal cast iron
- 2 long saddles with holes for double bend
- Gears and pinions in hardened steel operate in oil bath
- Control board IP54 water proof
- 6 Programmable Bending Angles (Digital Control Board)
- Protection fuses and overload relay for motor protection
- Manual control with push-buttons or remote foot pedal
- 4 wheels for easier movement & placement on site

Feal Seam is an advanced rebar machinery company located in Italy, where they design and manufacture high quality rebar bending & cutting equipment for the global construction and mining industry. These tools are used around the world in high production factory and remote on-site environments for the construction and rebar manufacturing industries.
