

ICARO P55 Electric Rebar Bender

ICARO are a well known manufacturer of rebar hydraulic tools for the construction industry for Italy as well as various global markets. ICAROs model P55 spiral & ring benders offers a range of extremely powerful & reliable units.

This machine is suitable for high production bending in fabrication workshops as well as on-site construction applications. The P55 features precision designed heat treated alloy steel rollers for reliable use when in operation.

This unit is available with electronic pre-set controls for up to 10 programmed angles for bending (the standard model has a pre-set range of up to 5 programmed setting). These units are designed & precision manufactured in Italy.

<u>Specifications</u>	ICARO P55 Spiral Rebar Bender
Motor	380 Volt / 5Kw
Maximum Bending Operation	65Kgs / mm ² (ø46 material) 80Kgs / mm ² (ø42 material)
Weight	800Kgs
Dimensions L x W x H	Total: 1400 x 950 x 950mm
Standard Accessories	Bending Dies & Pins
