

## Krenn KM10 Manual Mesh Rebar Cutter

The Krenn manual mesh rebar cutters are made of high quality German tool steel and is heat treated assuring the user with a durable and reliable design. Due to the operating handles being 900mm in length, it provides the operator with an easier operation as there is no need for the user to cut the material whilst kneeling or crouching.

The KM10 features a three edged reversible blade design to increase the productivity and lifespan of the blades function. The KM10 is precision manufactured and designed by Krenn in Germany.
