

Lobster EEF-203 Cable Stripper

**FOR PROFESSIONALS THAT
NEED TO STRIP CABLE IN A
MATTER OF SECONDS**

Stainelec Hydraulic Equipment is the Australian distributor of Lobster's new cable stripper. The Lobster cable stripper is designed to strip double insulated flat cable in one tool. The unique design strips outer sheathing in one action and three conductors (or 2) in one operation.

In a matter of seconds the cable is ready to terminate, saving time with this procedure. Lobster cable stripper has been designed to accept Australian standard flat twin and earth TPS PVC/PVC cable for both 1.5 square mm and 2.5 square mm cable.

The cable stripper is light weight and easy to use and causes no cuts or marks to the copper conductors. Lobster (Japan) are manufacturers of precision tools to the highest quality since 1888.
