

# MDC300 Cordless Hydraulic Spreader/Cutter

Innovators in  
Precision  
Hydraulic  
Cutting Tools &  
Equipment

**MADE IN  
ITALY**

The MDC300 cordless 18V hydraulic cutter & spreader is a precision engineered machine that can be used to spread and cut through metal obstructions in extrication scenarios as well as demolition & steel fabrication applications.

This unit features a cutting head that is hydraulically driven and can produce up to 550 Bar of pressure.

Fitted with a special grip and easy to use controls, the user will always have full control of the tool when in operation. This tool is powered by a reliable DeWalt 18V Li-Ion battery & motor.
