

NEX-2EGS Hydraulic Power Pack

The NEX-2EGS electric hydraulic power pack pump is suitable for various applications to power small to medium sized hydraulic cylinders and tools. Being lightweight and extremely portable at 14kgs it is easy to transport between on-site and factory based operations.

The NEX-2EGS is an ideal product for workers who need to require an extremely reliable and compact hydraulic electric pump to power their hydraulically driven gear with ease. Such items that can be powered are cylinders, jacks, flat bar cutters & benders (etc.).

All Osaka Jack products and equipment are designed and precision manufactured in Japan to the highest of international standards.
