

# Ogura HBB-90DF Hydraulic Rebar Bender

Made In Japan

Ogura HBB-90DF cordless rebar benders have been designed to bend 16mm (D16) rebar to 90 degrees in 8 seconds. These rebar benders are specially designed for cordless operation and comply with WH&S requirements for the rebar industry.

The rebar benders develop up to 600 bar output from the radial hydraulic pump featuring an advanced design and powered by Makita's LX DC-motor with the new 18V Li-Ion rechargeable batteries.

HBB-90DF cordless rebar benders are suitable for various applications in the construction industry and are used by steel fixers needing to bend rebar within the formwork or bend starter bars after the pouring of the slab or footings.

<b>Ogura HBB-90DF Hydraulic Rebar Cutter</b>	
<b>Max. Bending Capacity:</b>	16mm Diameter Rebar
<b>Max. Bending Angle:</b>	90 Degrees
<b>Motor:</b>	Makita 18 Volt Li-Ion Battery
<b>Weight:</b>	10.4Kgs

**FOR PROFESSIONALS THAT NEED TO BEND HIGH TENSILE 16MM DIAMETER REBAR WITH EASE**
