

PEDAX are a well known manufacturer of rebar production machinery for the international construction & rebar manufacturing industry.

This machine is suitable for high production rebar cutting in fabrication workshops as well as on-site construction applications. The Simplex 35EV features precision designed heat treated cutting blades for reliable use when in operation.

Simplex 35 EV Features:

- Fast and efficient performance when shearing rebar
- Features high quality cutting blades for continuous use
- Boasts user friendly controls and overall design
- Boasts a solid steel frame
- Easy to maintain and service
- Cutting strokes can be stopped during operation for safety

The PEDAX Simplex rebar cutting range are designed to be used in on-site & factory based operations and have been used in the toughest climates and regions around the world. The Simplex 35EV is designed & precision manufactured in German to the highest of international standards.

Cuts Per Minute	20
Blade Length (mm)	60mm
Connected Load	3kW
Net Weight	340Kgs
Dimensions (L x W x H)	800 x 730 x 750mm
