

Stainelec Notching Pliers

Key notch for electrical push buttons; 22.5mm or 30mm holes

- Easy and quick punching of notches in Mild Steel 2.4 and 1.6 Stainless Steel
- Offers a quick notching action compared to filing the material
- Can notch 3.2mm or 4.8mm (by turning the punching head 180 degrees)
- Long tool-life due to both punch & die are made of hardened tool steel
- Easy punching due to high lever transmission; plastic-laminated handles
- Lightweight and portable, easy to operate

Punch to be inserted in the pre-punched hole opening. Stainelecs HP-1 & HP-2 hydraulic hole punchers are most suited to punch the 22.5 & 30mm push button holes.
