

SP-100 Manual Stud Puncher

BOASTS A LIGHTWEIGHT & PORTABLE DESIGN

The SP-100 stud puncher is suitable for electricians, plumbers, air conditioning installers and all contractors requiring to punch holes in steel studs for construction projects or housing and commercial installations.

Featuring a user friendly design, this tool will punch the standard size holes of 25.4, 28, 32.2 & 34.1mm which are common for the Australian market. These hole sizes will accept PVC bushes which are available from electrical wholesalers that are stockists of conduit and cable bushes and grommets.

Weighing 3.5kgs the SP-100 stud punch is designed to punch up to 1.2mm mild steel & 0.9mm tensile mild steel (metal frame studs) thick material. Punch and die sets can be interchanged easily. This unit offers the operator a user friendly design and precision made punching dies for more efficient operation.

FOR PROFESSIONALS THAT NEED TO PUNCH HOLES IN STEEL FRAME HOUSING
