T22 Rebar Cutter - TPS 22N Petrol Motor Body

Model T22 rebar cutter - TPS22N petrol body is a cordless 22mm diameter high tensile rebar cutter. This unit is powered by a Honda 4 stroke petrol motor which drives the precision designed radial pump that develops an output of 25 tons / 570 bar of hydraulic pressure.

Edilgrappas portable cordless rebar cutters along with Honda's GX35 petrol engine power supply are engineered for versatile operation, making them suitable for most construction worksites. These units are especially suitable for sites that do not have access to electrical outputs. The interchangeable head system offers the user a wide range of bending, cutting & straightening heads to choose from.
