

TC180 Hydraulic Cable Cutter

Innovators in
Precision
Hydraulic
Cutting Tools &
Equipment

**MADE IN
ITALY**

The TC180 hydraulic cable cutter will suit all cable cutting requirements to the electrical engineering industry for heavy duty copper & aluminium cables up to a maximum of 180mm diameter.

This precision hydraulic cutting system is 100 percent blockage free, making this cutter fast and reliable when in operation. This unit features an WH&S compliant design and is user friendly for today modern worksite and workshop.

The TC180 cutter requires NO hot works permit when used in on-site or factory based operations and are a safer alternative than other conventional cutting methods, such as grinding or friction cutting equipment.

This unit is precision manufactured and designed in Italy to the highest of ISO9000 commercial standards and is available from Stainelec Hydraulic Equipment.
