

TP50 Electric Hydraulic Steel Flat Bar Cutter

Innovators in Precision Hydraulic Cutting Tools & Equipment

MADE IN ITALY

Model TP50 electric hydraulic flat bar cutter has been designed to cut maximum 50 x 16mm flat bar material with ease. This unit is powered by a reliable 230 volt / 1150 watt motor which drives the precision designed radial pump that develops a hydraulic output pressure of 570 bar, as well as an impressive cutting force of 25 Ton.

Stainelec offer precision designed cutters which are engineered for versatile operation, making them suitable for most construction worksites and factory based applications. This unit is ideally used to cut copper, mild steel and aluminium flat bar.

The TP50 is designed & precision manufactured in Italy to the highest of international standards for the global construction market.
