

# WRC20 Electric Hydraulic Cable Cutter

Innovators in  
Precision  
Hydraulic  
Cutting Tools &  
Equipment

**MADE IN  
JAPAN**

The WRC20 electric cable cutting range is designed to cut 20mm steel strand cable, steel core wire rope & insulated copper cable. These tools feature premium powdered high speed steel cutting blades with titanium coating for better blade longevity.

The WRC20 electric hydraulic cable cutter requires NO hot works permit when used in on-site or factory based operations and are a safer alternative than other conventional cutting methods, such as grinding or friction cutting equipment.

This unit is precision manufactured and designed in Japan to the highest of JIS commercial standards and is available from Stainelec Hydraulic Equipment.
