

## EG3-220S Electric Hydraulic Radius Corner Bench Punch

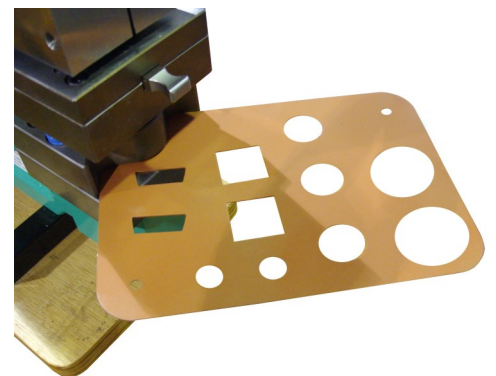

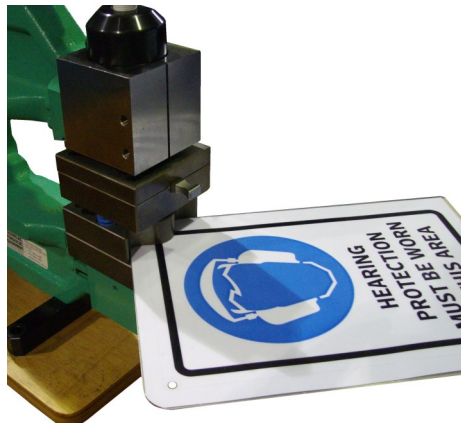

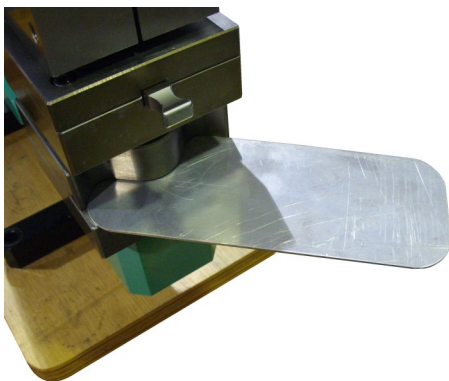

The EG3-220S hydraulic radius corner puncher is ideal for sheet metal fabricators and sign manufacturers. This electric hydraulic puncher features a precision designed fixed punch and die head which gives an accurate and clean finish on the work piece material.

Made in Japan, Kamekura hydraulic hole punchers are precision manufactured tools giving a life time of reliable service to any tradesman requiring to penetrate radius corner holes in mild steel and aluminium sheet metal. Kamekura hydraulic equipment is extensively used in fields such as electrical switchboard manufacturer's, sign manufacturers and general sheetmetal workshops.

### Main Features:

- Output Capacity - 4 ton / 350 Bar
- Relief valve on hydraulics output to protect frame unit
- Maximum material thickness; 2mm Mild Steel & Aluminium Plate
- Throat length of frame; 220mm

**PRECISION DESIGNED & MANUFACTURED IN JAPAN**
